Sweet, little mouse, you don’t know you’re a hero to millions of us worldwide. But you are. And we love and honor you.

– Dr. Cindy A. Buckmaster

Studies with mice have helped researchers understand health and disease in virtually every system of our bodies, informing treatments for:

- Cystic fibrosis
- AIDS and HIV
- Cancer
- Blindness
- Immune system disorders
- Addiction
- Eating disorders
- Parasitic infections
- Alzheimer’s disease
- Cardiac arrest
- Brain injuries
- Parkinson’s disease
- Influenza
- Stroke
- Anxiety, PTSD
- Malaria
- And much more
